Cloud-Native FP&A Systems Architect | Finance Analytics Researcher | AI-Assisted Reporting & Decision Support

FP&A and finance analytics professional focused on financial reporting automation, KPI governance, and AI-assisted decision support, with active research on modern FP&A architecture.

REVIEWER-RELEVANT EXPERTISE

Financial analytics & reporting automation · FP&A systems and KPI governance · AI-assisted financial decision support · Business intelligence & information systems · Data transformation with Excel, Power Query, SQL, and Python · Management and executive reporting workflows

PROFESSIONAL EXPERIENCE

Insurance Financial Analyst — FP&A, Pricing & Reporting Automation Aug 2024 – Present

Pets Best Insurance Services LLC • Dallas, TX

- Designing a governed reporting layer in SQL Server with Excel and Power Query transformation logic, improving refresh speed, data quality, and KPI consistency across recurring finance reporting.
- Produce weekly KPI reports on Gross Written Premium (GWP), Average Written Premium (AWP), New Business Written (NBW), policy counts, and channel performance metrics for finance and pricing leadership.
- Support the Monthly Business Review (MBR) cycle and prepare monthly management reporting in Vena — consolidating premium, channel, and KPI data into executive-facing outputs.
- Standardized reporting logic and KPI definitions across pricing, actuarial, and finance workflows as a key contributor to the finance reporting architecture.
- Developing an Insurance FP&A AI Agent prototype to explore variance analysis, KPI commentary, premium forecasting, and management reporting automation.

FP&A Analyst — Financial Reporting & Data Automation Feb 2024 – Aug 2024

Sirius Point (Global Specialty Reinsurer) • New York, NY

- Delivered weekly, monthly, and quarterly executive financial reporting for reinsurance programs and MGA carrier relationships; automated premium and performance reporting using Excel and Power Query with leadership dashboards in Prism and Finance Data Warehouse.
- Supported Workday Adaptive Planning implementation — UAT, data validation, and chart-of-accounts mapping.

Financial Analyst Jul 2019 – Jul 2021

Secutech Automation Ltd. • India

- Built Excel-based financial and project cost models supporting operational performance tracking and management reporting.

RESEARCH PORTFOLIO & RECOGNITION

- **Best Research Paper Award, IBAC 2026** — International Business Analytics Conference, for research on modern FP&A architecture and finance analytics.
- **SSRN Research Series** — three working papers evaluating cloud-native and Excel-integrated alternatives to traditional FP&A platform workflows and AI-assisted financial reporting, with manuscripts submitted to peer-reviewed outlets.
- **Guest Lecturer, Stevens Institute of Technology** — cloud-native FP&A architecture and AI-assisted financial reporting (2025–26).
- **Speaker, AFP Forum** — cloud-native finance transformation and AI-assisted financial planning workflows.
